Director

Subject: Context Sensitive Solutions Training for California

I would like to take this opportunity to thank you for your interest in Caltrans' Context Sensitive Solutions training effort. To ensure transportation projects meet the needs of both the traveling public and neighboring communities, Caltrans is committed to strengthening relations with our partners. Through this training you will learn that by working as partners, Caltrans and its stakeholders can develop transportation projects that meet safety, reliability, performance, flexibility, stewardship, and productivity goals. These goals will be integrated into transportation improvements to better reflect the needs of people who live, work, and travel through our communities. I encourage you to attend this valuable training.
