# FUTURE OF AVIATION

Thursday, August 4, 2022

Advancing Aerial Mobility  
through Technology, Sustainability,  
and On-Demand Flight

San Francisco International Airport

Berkeley Institute of  
Transportation Studies

## Impact of Airports today

- 7,628 commercial aircraft and 211,749 general aviation aircraft
- 19,600 landing areas, 14,556 private-use, 5,080 public-use
- Direct and catalytic sectors reflect 5% percent of our Gross Domestic Product, \$1.8 trillion in total economic activity and supports nearly 11 million jobs.

Advancing Aerial Mobility  
through Technology, Sustainability,  
and On-Demand Flight

San Francisco International Airport

Berkeley Institute of  
Transportation Studies

## Impact of Airports today

- **Example from North Carolina**
  - 62 general aviation airports
  - \$11.6 million in tax revenues generated by based aircraft
  - 3,300 aircraft based at the state's GA facilities
- **Tax revenue example**
  - \$23 million plane - pays local property taxes equivalent to those paid by owners of 115 \$200,000 homes – without the same need for supporting government services

Advancing Aerial Mobility  
through Technology, Sustainability,  
and On-Demand Flight

San Francisco International Airport

Berkeley Institute of  
Transportation Studies

**Emerging use cases for AAM and UAS to serve  
emergency response and humanitarian missions**

**Submit questions regarding the  
use cases we mention.**

**Slido.com**

**Meeting Code #2637125**

**Room: Looper**
