# FOR MOST REGIONAL TRIPS IN THE US TODAY, THE CAR IS THE ONLY VIABLE OPTION

## Long-distance

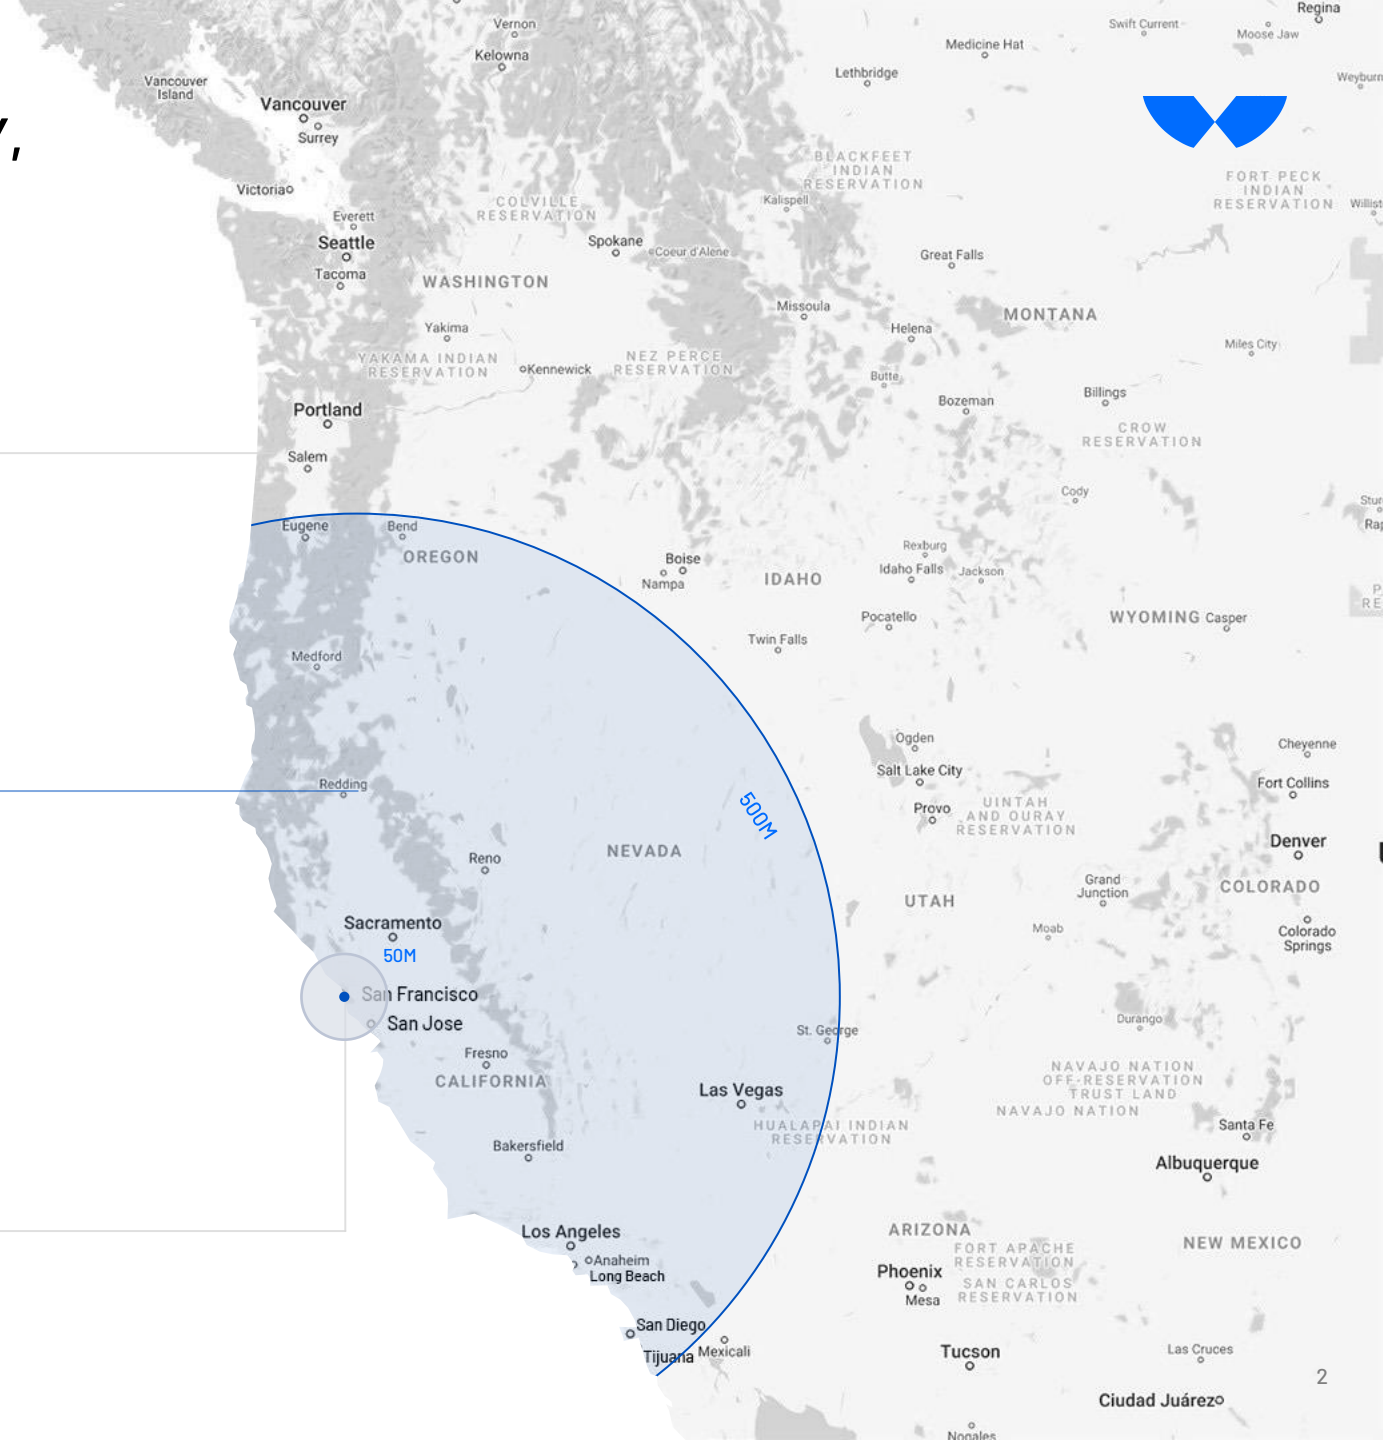

Commercial air travel is fast, affordable, and efficient

## Regional mobility

For most routes, the only available mode option is car, which is highly inefficient

## Urban mobility

Many fast, affordable mode options

**OUR AUTOFLIGHT SYSTEM HAS  
FULL GATE-TO-GATE  
AUTONOMOUS FLIGHT  
CAPABILITY**

Sensor-based Detect and Avoid solutions for ground and airborne obstacles

Optimized and dynamic path-planning

Taxi, takeoff, navigation, landing

Remotely supervised operations

Automated handling of failure modes

# BREAKING DOWN THE FUNCTIONAL ROLE AND CAPABILITIES OF THE PILOT

## A Aviate

- Fly the airplane
- Manipulate the controls
- Actuate switches

## B Navigate

- Safely travel from point to point
- Avoid hazards
- Using eyes and brain to identify threats and make conscientious decisions

## C Communicate

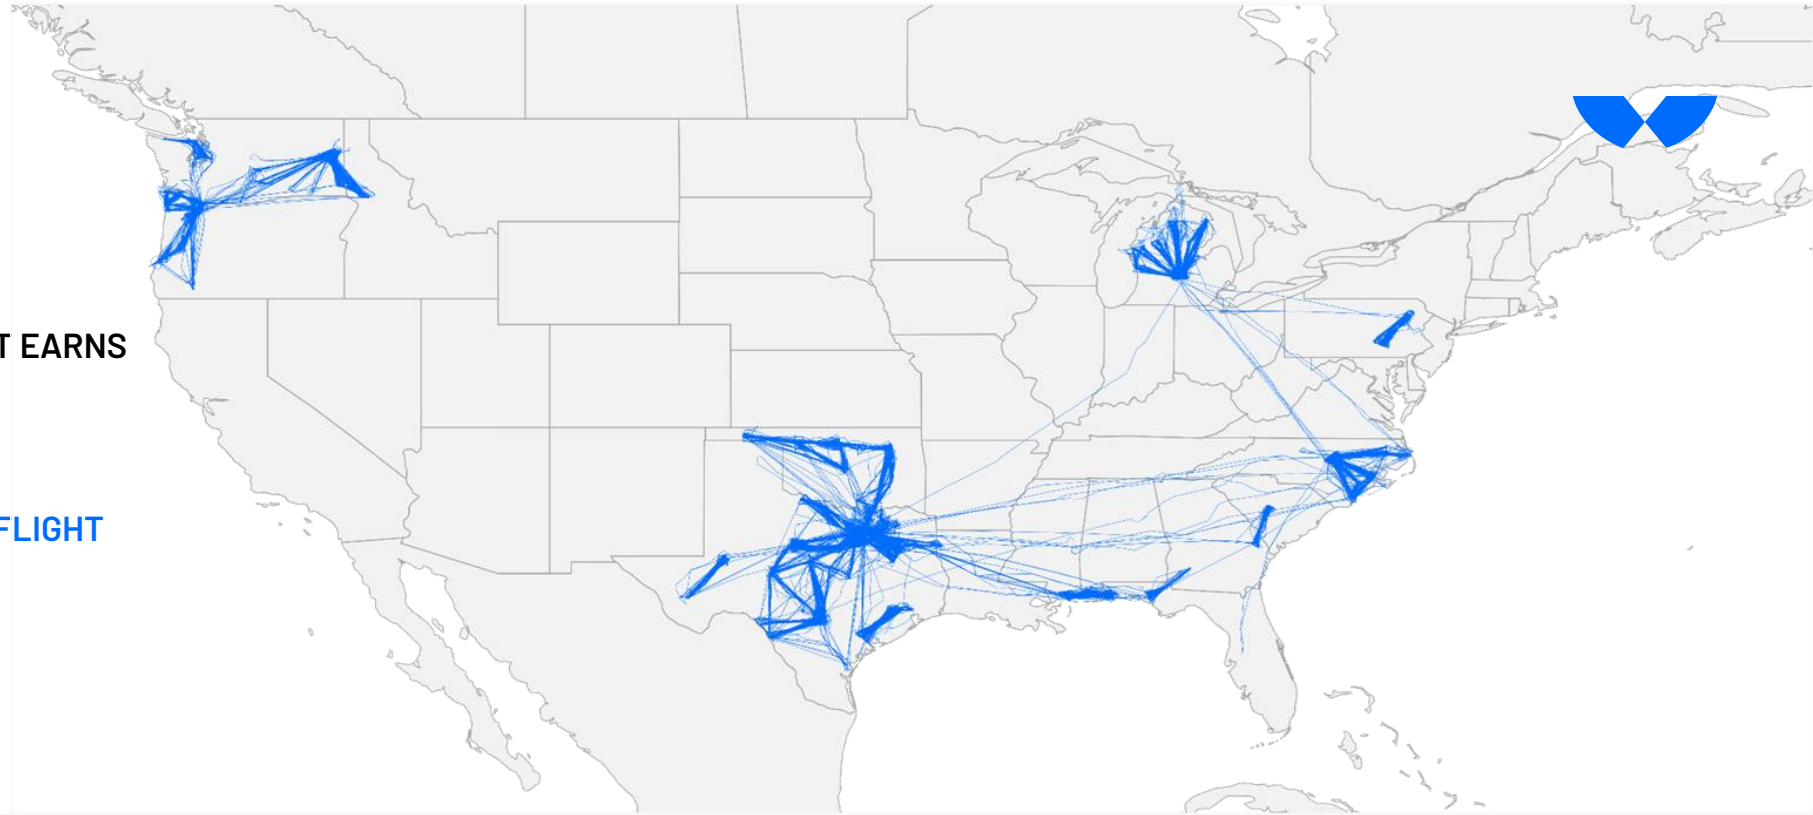

- Talk with air traffic control operators
- Talk with other aircraft in the airspace

# OUR OPERATIONS

ESTABLISHED OPERATING BUSINESS THAT EARNS SIGNIFICANT REVENUE WITH UPS

HAVE GROWN OUR PILOTED COMMERCIAL FLIGHT OPERATIONS 18X IN THE LAST 12 MONTHS

**400 flights per week** out of Portland, Lansing, Dallas, Raleigh, and Other Cities

Our current operations serve the UPS cargo feeder network

**35**

Aircraft

**58**

Cities

**14**

States

**15K**

Hours of flight data recorded annually

**250K**

lbs of cargo per week

**2**

FAA Certificated Repair Stations
